# Reddit Privacy Policy

Effective: June 28, 2025. Last Revised: May 29, 2025.

## Introduction

At Reddit, we believe that privacy is a right. We want to empower our users to be the masters of their identity. In this privacy policy, we want to help you understand how and why Reddit ("Reddit," "we" or "us") collects, uses, and shares information about you when you use our websites, mobile apps, widgets, APIs, emails, and other online products and services (collectively, the "Services") or when you otherwise interact with us or receive a communication from us.

We want this privacy policy to empower you to make better choices about how you use Reddit. We'd love for you to read the whole policy, but if you don't, here is the TL;DR:

- [Reddit is a public platform.](#)

Reddit is a public platform. Our communities are largely public and anyone can see your profile, posts, and comments.

- [We collect minimal information about you.](#)

We collect minimal information that can be used to identify you by default. If you want to just browse, you don't need an account. If you want to create an account to participate in a subreddit, we don't require you to give us your real name. We don't track your precise location. You can even browse [anonymously](#). You can share as much or as little about yourself as you want when using Reddit.

- [We use data to make Reddit a better place.](#)

Any data we collect is used primarily to provide our Services, which are focused on allowing people to come together and form communities. We don't sell your personal data to third parties, including data brokers.

- [All of our users get privacy rights - not just those in select countries.](#)

Privacy rights are for everyone. At Reddit, anyone can request a copy of their data, account deletion, or information about our policies.

- [If you have questions about how we use data, just ask.](#)

We've tried our best to make this as easy to understand as possible but sometimes privacy policies are still confusing. If you need help understanding this policy or anything about Reddit, [just ask](#).

## Reddit Is a Public Platform

Much of the information on the Services is public and accessible to everyone, even without an account.

When you submit content (for example, a post, comment, or chat message) to a public part of the Services, any visitors to and users of our Services will be able to see that content, the username associated with that content, and the date and time you originally submitted that content. That content and information may also be available in search results on internet search engines like Google or in responses provided by an AI chatbot like OpenAI's ChatGPT. You should take the public nature of the Services into consideration before posting. By using the Services, you are directing us to share this information publicly and freely.

Your Reddit account has a profile page that is public. Your profile contains information about your activities on the Services, such as your username, prior posts and comments, karma, trophies and achievement badges, profile display name, about section, social links, avatar or profile image, moderator, contributor, and Reddit Premium status, communities you are active in, and how long you have been a member of the Services (your cake day).

We offer social sharing features that let you share content or actions you take on our Services with other media. Your use of these features enables the sharing of certain information with your friends or the public, depending on the settings you establish with the third party that provides the social sharing feature. For more information about the purpose and scope of data collection and processing in connection with social sharing features, please visit the privacy policies of the third parties that provide these social sharing features (for example, [Tumblr](#), [Facebook](#), and [X](#)).

[Skip to main content](#)[Create](#)

content and aggregate information (for example, voting ratios) before sharing. We also require third parties to pay licensing fees for access to larger quantities of content and information. Reddit's [Developer Terms](#) are our standard terms governing how these services are used by third parties. Please review our [Public Content Policy](#) for more information about how your public content is publicly available and accessible to anyone with access to the internet.

## What Information We Collect

### Information You Provide to Us

We collect information you provide to us directly when you use the Services. This includes:

**Account Information** You don't need an account to use Reddit. If you create a Reddit account, your account will have a username, which you provide or which is automatically generated. Your username is public, and it doesn't have to be related to your real name. You may need to provide a password, depending on whether you register using an email address, Single Sign-On (SSO) feature (such as Apple or Google), or phone number. If your account does not have a password, we may send you a SMS message for verification purposes. We also ask you to select an interest, or multiple interests, during account creation (for example, history, nature, sports) to help generate content and community recommendations or select more relevant advertising for you.

When you use Reddit, you may also provide other information, such as a bio, gender, birthday, location, language, profile picture, or social link. You can remove or revise this information at any time.

We also store your user account preferences and settings. We may ask for such information prior to you creating a username or account to help improve your experience exploring Reddit.

**Public Content You Submit** Public content you submit includes your public posts, comments, and chat messages, usernames, and some of your profile information, as well as related metadata. Public content you submit may also include text, links, images, gifs, audio, videos, software, and tools. Our [Public Content Policy](#) applies to this content.

**Non-Public Content You Submit** Non-public content you submit includes your saved drafts of posts or comments, your non-public messages with other users (such as private messages, private chats, and modmail), and your reports and other communications with moderators and with us. Non-public content you submit may also include text, links, images, gifs, audio, videos, software, and tools.

It also includes information you submit when you fill out a form or survey, participate in Reddit-sponsored activities, promotions, or programs, request customer support, or otherwise communicate with us.

**Actions You Take** We collect information about the actions you take when using the Services. This includes your interactions with the platform and content, like voting, saving, hiding, and reporting. It also includes your interactions with other users, such as following and blocking. We collect your interactions with communities, like your subscriptions or moderator status.

**Transactional Information** If you purchase products or services from us or otherwise through the Services, you will have to provide payment information in order to complete your purchase. Reddit uses industry-standard payment processor services (such as Stripe) to handle payment information, and those services are subject to separate terms and conditions and privacy policies. We will collect information about the product or service you are purchasing (for example, purchase dates, amounts paid or received, and expiration and renewal dates).

We may also collect public blockchain data and addresses, such as when you purchase or create a Collectible Avatar, receive or mint an NFT, or create a Reddit

[Skip to main content](#)[Create](#)

#### Information We Collect As You Use Our Services

We automatically collect information as you use our Services. This includes:

*Logs Data* We collect device and network connection information when you access and use the Services. This may include your IP address, user-agent string, browser type, operating system, referral URLs, device information (such as device IDs), device settings, and mobile carrier name. Except for the IP address used to create your account, Reddit will delete any IP addresses collected after 100 days.

*Usage Information* We collect information about how you use our Services, like pages visited, how you interact with content, ads, and communities, upvotes/downvotes, links clicked, the requested URL, and search terms.

*Information Collected From Cookies and Similar Technologies* We may receive information from cookies, which are pieces of data your browser stores and sends back to us when making requests, and similar technologies. We use this information to deliver and maintain our Services, improve your experience, understand user activity, personalize content and advertisements, measure the effectiveness of advertising on and off Reddit, and improve the quality of our Services. For example, we store and retrieve information about your preferred language and other settings. See our [Cookie Notice](#) for more information about how Reddit uses cookies. For more information on how you can disable cookies, please see "Your Rights and Choices" below.

*Location Information* We automatically collect information about your approximate location based on our Logs Data. We may also receive location information from you when you choose to share such information on our Services, including via the Location Customization setting or by associating your content with a location.

*Public Content Related to You* Information that we collect about you based on your interactions on our Services will appear on your public profile. This includes your karma scores, trophies and achievement badges, moderator, contributor, and Reddit Premium status, communities you are active in, and how long you have been a member of the Services (your cake day), as well as related metadata. Our [Public Content Policy](#) applies to this content.

*Inferred Information* We infer attributes such as age range, gender, and/or preferred language(s) based on the information we have about you.

#### Information Collected from Other Sources

We may receive information about you from other sources, including from other users and third parties, and combine that information with the other information we have about you. For example, we may receive demographic or interest information about you from third parties, including advertisers (such as the fact that an advertiser is interested in showing you an ad), and combine it with data you have provided to Reddit, using a common account identifier such as a hash of an email address or a mobile-device ID. You can control how we use this information to personalize advertisements for you by visiting the User Settings menu in your account, as described in the section titled "Your Rights and Choices" below.

*Linked Services* If you authorize or link a third-party service, such as an unofficial mobile app client, to access your Reddit account, Reddit receives information about your use of that service when it uses that authorization. Linking services may also cause the other

[Skip to main content](#)[Create](#)

"How We Share Your Information" below.

*Information Collected From Integrations*

We also may receive information about you, including log and usage data and cookie information, from third-party sites that integrate our Services, including our embeds and advertising technology. For example, when you visit a site that uses [Reddit Embeds](#), we may receive information about the web page you visited. Similarly, if an advertiser incorporates Reddit's ad technology, Reddit may receive limited information about your activity on the advertiser's site or app, such as whether you bought something from the advertiser. You can control how we use this information to personalize the Services and ads on and off Reddit for you as described in "Your Rights and Choices" below.

Information Collected if You Use Certain Reddit Offerings

*Reddit Ads Users*

If you use Reddit Ads (Reddit's self-serve ads platform at [ads.reddit.com](#)) on behalf of your business or organization, we collect some additional information. To sign up for Reddit Ads, you must provide your name, email address, and information about your company. Reddit may make information about your company public to comply with applicable law. If you purchase advertising services, you will need to provide transactional information as described above in "Information We Collect - Transactional Information," and we may also require additional documentation to verify your identity. When using Reddit Ads, we may record a session replay of your visit for customer service, troubleshooting, and usability research purposes.

*Reddit Pro Users*

If you sign up for Reddit Pro, on behalf of yourself, your business or your organization, we may collect some additional information from you, including your profile type, name, industry category, website, and organization size, if applicable. If you request certain limited Reddit Pro features, we may request additional documentation to verify your identity.

*Reddit Program Participants and Potential Participants*

If you sign up to participate in a Reddit Program (for example, our Contributor Program), we collect, directly or indirectly through our providers, some additional information from you (such as your name, date of birth, address, email, tax, government ID, and payment information). This additional information is used and shared with our third-party payment and compliance providers to determine your eligibility to participate in the applicable Reddit Program, facilitate payments, and comply with law. Those providers and their services are subject to separate terms and conditions and privacy policies.

Information Collected by Third Parties

*Embedded Content*

Reddit displays some linked content in-line on the Services via embeds. For example, Reddit posts that link to YouTube or X may load the linked video or tweet within Reddit directly from those services to your device so you don't have to leave Reddit to see it. In general, Reddit does not control how third-party services collect data when they serve you their content directly via these embeds. As a result, embedded content is not covered by this privacy policy but by the policies of the service from which the content is embedded.

[Skip to main content](#)[Create](#)

demographic information about the population that does Reddit to provide this demographic information, these companies collect cookie information to recognize your device.

## How We Use Your Information

We use information about you to:

- Provide, maintain, and improve the Services;
- Provide you personalized, age-appropriate services, content, and features;
- Provide you with relevant advertising, including personalized advertising on Reddit;
- Optimize and measure the effectiveness of ads shown on our Services;
- Advertise Reddit Services to you on other sites and apps, including measuring the performance of those ads;
- Help protect the safety of Reddit and our users, which includes blocking suspected spammers, addressing abuse, age restricting certain content and enforcing our rights, the Reddit User Agreement and our [other terms and policies](#), as well as comply with applicable law;
- Research and develop new services;
- Send you technical notices, updates, security alerts, invoices, and other support and administrative messages;
- Provide customer service;
- Communicate with you about products, services, offers, promotions, events, and programs, and provide other news and information we think will be of interest to you (for information about how to opt out of these communications, see "Your Rights and Choices" below); and
- Monitor and analyze trends, usage, and activities in connection with our Services.

## How We Share Your Information

In addition to the ways that public content is shared as described above in "Reddit Is a Public Platform," we may share information in the following ways:

- *With your consent.* We may share information about you with your consent or at your direction. For example, at your direction through social sharing features that allow you to share content with third party sites like Tumblr and X.
- *With linked services.* If you link your Reddit account with a third-party service, Reddit will share the information you authorize with that third-party service. You can control this sharing as described in "Your Rights and Choices" below.
- *With our service providers.* We may share information with vendors, consultants, and other service providers who need access to such information to carry out work for us. Their use of personal data will be subject to appropriate confidentiality and security measures. A few examples: (i) payment processors who process transactions on our behalf, (ii) cloud providers who host our data and our services, (iii) third-party ad serving and measurement providers who help us and advertisers serve relevant ads and measure the performance of ads (by disclosing information such as cookie IDs, your IP address, and/or a hashed version of your email; these third parties may combine that information with other information they already have about you to provide services to Reddit), (iv) age verification providers who help us confirm your age, and (v) compliance providers who help us determine your eligibility to participate in Reddit Programs.
- *To comply with the law.* We may share information if we believe disclosure is in accordance with, or required by, any applicable law, regulation, legal process, or governmental request, including, but not limited to, meeting national security or law enforcement requirements. To the extent the law allows it, we will attempt to provide you with prior notice before disclosing your information in response to such a request. Our [Transparency Report](#) has additional information about how we respond to government requests.
- *In an emergency.* We may share information if we believe it's necessary to prevent imminent and serious bodily harm to a person.
- *To enforce our rights and promote safety and security.* We may share information if we believe your actions are inconsistent with our User Agreement, [rules](#), or [other Reddit terms and policies](#), or to protect the rights, property, and safety of the Services, ourselves, and others.
- *With our affiliates.* We may share information between and among Reddit, and any of our parents, affiliates, subsidiaries, and other companies under common control and ownership.
- *Aggregated or de-identified information.* We may share information about you that has been aggregated or anonymized such that it cannot reasonably be used to identify you. For example, we may show the total number of times a post has been upvoted without identifying who the visitors were, or we may tell an advertiser how many people saw their ad.

[Skip to main content](#)[Create](#)

We take measures to help protect information about you from loss, theft, misuse and unauthorized access, disclosure, alteration, and destruction. For example, we use HTTPS while information is being transmitted. We also enforce technical and administrative access controls to limit which of our employees have access to non-public personal information.

You can help maintain the security of your account by configuring [two-factor authentication](#).

We store the information we collect for as long as it is necessary for the purpose(s) for which we originally collected it. We may retain certain information for legitimate business purposes and/or if we believe doing so is in accordance with, or as required by, any applicable law. For example, if you violate our policies and your account is suspended or banned, we may store the identifiers used to create the account (such as phone number) to prevent you from creating new accounts.

## Your Rights and Choices

You have choices about how to protect and limit the collection, use, and sharing of information about you when you use the Services. Depending on where you live, you may also have the right to correction/rectification of your personal information, to opt out of certain advertising practices, or to withdraw consent for processing where you have previously provided consent. Please see "Additional Information for EEA, Swiss, and UK Users" and "Additional Information for California & Other U.S. State Users." Below we explain how to exercise each of these rights. Reddit does not discriminate against users for exercising their rights under data protection laws.

### *Accessing and Changing Your Information*

You can access your information and change or correct certain information through the Services. See our [Help Center](#) page for more information. You can also request a copy of the personal information Reddit maintains about you by following the process described [here](#).

### *Deleting Your Account*

You may delete your account at any time from the settings page in your account. For more information, please visit our [Help Center](#). When you delete your account, your profile is no longer visible to other users and disassociated from content you posted under that account. Please note, however, that the posts, comments, and messages you submitted prior to deleting your account will still be visible to others unless you first delete the specific content. After you submit a request to delete your account, we initiate a deletion process to safely and completely remove your data from our servers or retain it only in anonymized form. After running our process, Reddit will not be able to provide access to deleted data. We may also retain certain information about you for legitimate business purposes and/or if we believe doing so is in accordance with, or as required by, any applicable law.

### *Controlling Linked Services' Access to Your Account*

You can review the services you have permitted to access your account and revoke access to individual services by visiting your account's [Apps page](#) (for third-party app authorizations), the Connected Accounts section of your [Account Settings](#) (for Google Sign-In, Sign in with Apple, and connected X accounts), and the Social links section of your [Profile Settings](#).

### *Controlling Personalized Advertising*

You may opt out of us using information we collect from third parties, including advertising partners, to personalize the ads you see on and off Reddit. To do so, visit the Privacy section of the User Settings in your account [here](#), if using desktop, and in your Account Settings if using the Reddit mobile app.

### *Controlling the Use of Cookies*

Most web browsers are set to accept cookies by default. If you prefer, you can usually choose to set your browser to remove or reject first- and third-party cookies. Please note that if you choose to remove or reject cookies, this could affect the availability and functionality of our Services. For more information on controlling how cookies and similar technologies are used on Reddit, see our [Cookie Notice](#).

### *Controlling Advertising and*

Some analytics providers we partner with may provide specific opt-out mechanisms and we may provide, as needed and as available, additional tools

[Skip to main content](#)[Create](#)

[Analytics Opt-out Browser Add-on](#). You can opt out of the Audience Measurement services provided by [Nielsen](#) and [Quantcast](#).

You may also generally opt out of receiving personalized advertisements from certain third-party advertisers and ad networks. To learn more about these advertisements or to opt out, please visit the sites of the [Digital Advertising Alliance](#) and the [Network Advertising Initiative](#), or if you are a user in the European Economic Area, [Your Online Choices](#).

#### *Do Not Track*

Most modern web browsers give you the option to send a Do Not Track signal to the sites you visit, indicating that you do not wish to be tracked. However, there is no accepted standard for how a site should respond to this signal, and we do not take any action in response to this signal. Instead, in addition to publicly available third-party tools, we offer you the choices described in this policy to manage the collection and use of information about you.

#### *Controlling Promotional Communications*

You may opt out of receiving some or all categories of promotional communications from us by following the instructions in those communications or by updating your email options in your account preferences [here](#). If you opt out of promotional communications, we may still send you non-promotional communications, such as information about your account or your use of the Services.

#### *Controlling Mobile Notifications*

With your consent, we may send promotional and non-promotional push notifications or alerts to your mobile device. You can deactivate these messages at any time by changing the notification settings on your mobile device.

#### *Controlling Location Information*

You can control how we use location information for feed and recommendations customization via the [Location Customization](#) setting in your Account Settings.

If you have questions or are not able to submit a request to exercise your rights using the mechanisms above, you may also email us at [reddittdatarequests@reddit.com](mailto:reddittdatarequests@reddit.com) from the email address that you have verified with your Reddit account, or submit your requests [here](#).

Before we process a request from you about your personal information, we need to verify the request via your access to your Reddit account or to a verified email address associated with your Reddit account. If we deny your request, you may appeal our decision by contacting us at [reddittdatarequests@reddit.com](mailto:reddittdatarequests@reddit.com).

## International Data Transfers

Reddit, Inc., is based in the United States and we process and store information on servers located in the United States. We may store information on servers and equipment in other countries depending on a variety of factors, including the locations of our users and service providers. By accessing or using the Services or otherwise providing information to us, you consent to the processing, transfer, and storage of information in and to the United States and other countries, where you may not have the same rights as you do under local law.

When we transfer the personal data of users in the EEA, UK and/or Switzerland, we rely on the Standard Contractual Clauses approved by the European Commission for such transfers or other transfer mechanisms deemed 'adequate' under applicable laws.

## EU-U.S., UK Extension, and Swiss-U.S. Data Privacy Frameworks Disclosure

Reddit complies with the EU-U.S. Data Privacy Framework (EU-U.S. DPF) and the UK Extension to the EU-U.S. DPF, and the Swiss-U.S. Data Privacy Framework (Swiss-U.S. DPF) as set forth by the U.S. Department of Commerce. Reddit has certified to the U.S. Department of Commerce that it adheres to the EU-U.S. Data Privacy Framework

[Skip to main content](#)[Create](#)

(Swiss-U.S. DPF Principles) with regard to the processing of personal data received from Switzerland in reliance on the Swiss-U.S. DPF. If there is any conflict between the terms in this privacy policy and the EU-U.S. DPF Principles and/or the Swiss-U.S. DPF Principles, the Principles shall govern. To learn more about the Data Privacy Framework (DPF) Program, and to view our certification, please visit <https://www.dataprivacyframework.gov/>.

Reddit's compliance with the DPF is subject to the investigatory and enforcement powers of the U.S. Federal Trade Commission. In accordance with the DPF, Reddit is also liable for onward transfers to third parties that process personal information in a way that does not follow the DPF unless Reddit was not responsible for the event giving rise to any alleged damage.

In some situations, the DPF Framework gives you the right to invoke binding arbitration. You can do this to resolve complaints not resolved by other means, as described in Annex I to the [DPF framework](#). In compliance with the EU-U.S. DPF and the UK Extension to the EU-U.S. DPF and the Swiss-U.S. DPF, Reddit commits to refer unresolved complaints concerning our handling of personal data received in reliance on the EU-U.S. DPF and the UK Extension to the EU-U.S. DPF and the Swiss-U.S. DPF to JAMS, an alternative dispute resolution provider based in the United States. If you do not receive timely acknowledgment of your DPF Principles-related complaint from us, or if we have not addressed your DPF Principles-related complaint to your satisfaction, please visit <https://www.jamsadr.com/dpf-dispute-resolution> for more information or to file a complaint. The services of JAMS are provided at no cost to you.

## Additional Information for EEA, Swiss, and UK Users

If you live in the European Economic Area ("EEA") or Switzerland, Reddit Netherlands B.V. is the controller of information processed in connection with the Reddit platform and this policy. If you live in the United Kingdom ("UK"), Reddit, Inc., is the data controller and Reddit UK Limited is Reddit's UK GDPR Article 27 Representative.

Users in the EEA, Switzerland, and UK have the right to request access to, rectification of, or erasure of their personal data; to data portability in certain circumstances; to request restriction of processing; to object to processing; and to withdraw consent for processing where they have previously provided consent. These rights can be exercised as described in the "Your Rights and Choices" section above. EEA and Swiss users also have the right to lodge a complaint with their local supervisory authority.

As required by applicable law, we collect and process information about individuals in the EEA, Switzerland, and UK only where we have a legal basis for doing so. Our legal bases depend on the Services you use and how you use them. We process your information where:

- It is necessary to fulfill our contract with you, including
- to provide, operate, and improve the Services, provide customer support, personalize features and to protect the safety and security of the Services;
- It satisfies a legitimate interest (which is not overridden by your data protection interests), such as preventing fraud, ensuring network and information security, enforcing our rules and policies, protecting our legal rights and interests, research and development, personalizing the Services, and marketing and promoting the Services;
- You have consented for us to do so for a specific purpose; or
- We need to process your information to comply with our legal obligations.

## Additional Information for California & Other US State Users

Some US state laws, including the California Consumer Privacy Act ("CCPA"), as amended, require us to provide residents with some additional information and rights, which we address in this section.

In the last 12 months, we collected the following categories of personal information from residents, depending on the Services used:

- Identifiers and account information, like your Reddit username, email address, phone number, IP address, and cookie information.
- Commercial information, including information about transactions you undertake with us.
- Internet or other electronic network activity information, such as information about your activity on our Services and limited information about your activity on the services of advertisers who use our advertising technology.
- Geolocation information based on your IP address.
- Your messages with other users (for example, private messages, private chats, and modmail).
- Audiovisual information in pictures, audio, or video content submitted to Reddit.
- Professional or employment-related information or demographic information, but only if you explicitly provide it to us, such as by filling out a survey.
- Inferences we make based on other collected data, for purposes such as recommending content, advertising, and analytics.

Q

Create

the purpose for sharing that information in the "How We Share Your Information" section.

Depending on your jurisdiction, and subject to exceptions and limitations provided by local law, in addition to the rights listed in "Your Rights and Choices" above, you may have: the right to opt out of any sales or sharing of your personal information, to request access to and information about our data practices, and to request deletion or correction of your personal information, as well as the right not to be discriminated against for exercising your privacy rights. Reddit does not "sell" or "share" personal information as those terms are defined under the CCPA or other applicable regulations. Reddit does not have knowledge that it "sells" or "shares" the personal information of users under 16 years of age. We do not use or disclose sensitive personal information except to provide you the Services or as otherwise permitted by the CCPA or other applicable regulations. We do not engage in profiling of consumers in furtherance of automated decisions that produce legal or similarly significant effects as those terms are defined in applicable regulations.

You may exercise your rights to access, delete, or correct your personal information as described in the "Your Rights and Choices" section of this notice. When you make a request, we will verify your identity by asking you to sign into your account or if necessary by requesting additional information from you. You may also make a rights request using an authorized agent. If you submit a rights request from an authorized agent who does not provide a valid power of attorney, we may ask the authorized agent to provide proof that you gave the agent signed permission to submit the request to exercise rights on your behalf. In the absence of a valid power of attorney, we may also require you to verify your own identity directly with us or confirm to us that you otherwise provided the authorized agent permission to submit the request. If you have any questions or concerns, you may reach us using the methods described under "Your Rights and Choices" or by emailing us at [redditdatarequests@reddit.com](mailto:redditdatarequests@reddit.com).

## Children

Children under the age of 13 are not allowed to create an account or otherwise use the Services. Additionally, if you are located outside the United States, you must be over the age required by the laws of your country to create an account or otherwise use the Services.

## Changes to This Policy

We may change this Privacy Policy from time to time. If we do, we will let you know by revising the date at the top of the policy. If the changes, in our sole discretion, are material, we may also notify you by sending an email to the address associated with your account (if you have chosen to provide an email address) or by otherwise providing notice through our Services. We encourage you to review the Privacy Policy regularly to stay informed about our information practices and the ways you can help protect your privacy. By continuing to use our Services after Privacy Policy changes go into effect, you agree to be bound by the revised policy.

## Contact Us

If you have other questions about this Privacy Policy, please contact us at:

Reddit, Inc.  
548 Market St. #16093  
San Francisco, California 94104

If you live in the United States, the data controller responsible for your information is Reddit, Inc.

For email inquiries, you may email us at [redditdatarequests@reddit.com](mailto:redditdatarequests@reddit.com) or reach our Data Protection Office at [dpo@reddit.com](mailto:dpo@reddit.com).

Users in the European Economic Area or Switzerland may contact us at:
